

HD Quick Release Valve Seat Puller

New and Improved HEAVY DUTY (HD) Quick Release Valve Seat Puller manufactured specifically for the drilling and mud pump fluid end market.

Designed to be safer, faster, stronger, and more user friendly than existing conventional tools.

With unmatched safety, ease of operations and superior tensile strength, it is unlike any other seat puller in the market.

I feel sorry for those pesky valve seats. The days of calling a welder to location to cut valve seats out of your fluid ends are finally over.

Proven, Trusted, and Guaranteed success when combined with our 200 Ton HD Aluminum Hydraulic Jack.

100% Replacement parts available.

FEATURES AND BENEFITS

- Compatible with API 6 – 8 full open drilling valve seats and "L" shape fluid ends
- Alloy puller shaft, 2" OD – 4.5" TPI, multiple lengths available
- Quick release puller head
- Plug & play with Acumen HD Aluminum Hydraulic Jack & conventional tools
- Rated at 200 tons

IMPROVED SAFETY

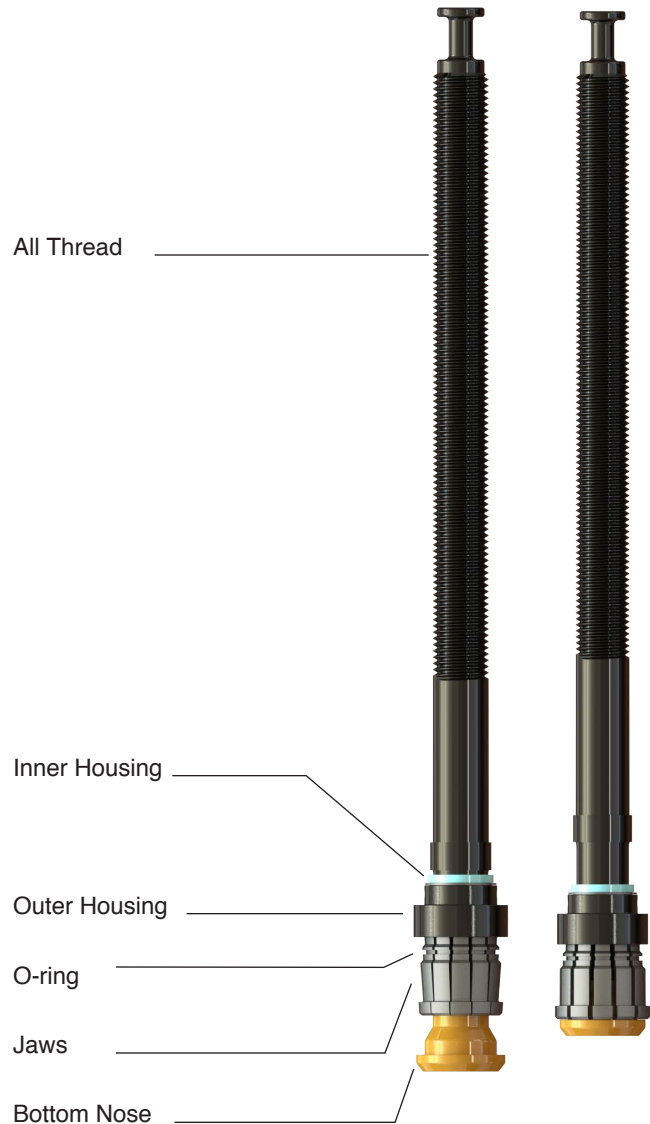

- ZERO pinch points
- No hands in fluid end
- Reduced HSE Risk

INCREASED EFFICIENCY

- No assembly and disassembly of puller head
- One person operations
- 50% - 70% faster

ENHANCED DURABILITY

- 360° valve seat puller surface
- Increase usable service life
- Heavy duty alloy steel parts
