

Multi-Hardness Interlocking Coil Tubing Stripper

FEATURES AND BENEFITS

- Special additive mixed with urethane to reduce friction wear
- Enhanced chemical degradation resistance
- Premium urethane compounds with higher tensile and abrasion resistance
- Operating temperature range 20°F to 230° F
- Operating range 1000 - 8000+ psi
- Not affected by OBM or synthetic based muds
- Full compatibility with all existing stripping heads
- Available in any size bore for the 4 1/16", 7 1/16" strippers and dual compound Top loads

 MADE IN USA

Snubbing Stripper Rubber - Hydra Rig Stripper
